Signing In

Go to crm.mysyde.com and sign in with your email and password.

If you forget your password:

Use "Use email link instead" on the login page to receive a magic link by email.

Signing out:

Click **Sign out** in the top-right corner next to your initials.

Team Access

Any team member can access the CRM. Send them to **crm.mysyde.com** and have them sign in with their work email. They'll receive a magic link the first time, and can set a password from there.

Every signed-in user can read and write all data. There are no separate permission levels at this time.

Your Daily Routine

Three things every morning — takes under 5 minutes:

1. **Board** — What moved yesterday? What needs to move today?
2. **Tasks** — What's due today? What's overdue?
3. **Sidebar** — Any renewals coming up? Any meetings to prep for?

Everything else (Partners, Contacts, Kiosks) you'll touch as needed, not daily.

Board — Sales Pipeline

This is where you'll spend most of your time. Every advertiser conversation lives here as a **deal card** moving left to right.

The rule: If an advertiser conversation isn't on the board, it doesn't exist.

The 7 Columns

Stage	When to use it
Prospect	You've identified a potential advertiser but haven't reached out yet
Pitched	You've had a conversation and introduced MySyde/the kiosk
Proposal	You've sent pricing or a formal proposal
Creative	Deal is agreed — now designing their ad
Live	Ad is running on the kiosk
Closed Won	Completed and paid
Closed Lost	Didn't close — keep these so you can see patterns over time

How to Use It

- **Add a deal** — click + **New Deal** at the top right
- **Move a deal** — drag the card to the next column as it progresses
- **Open a deal** — click any card to see the full detail record
- **Search** — press **Ctrl+K** to search from anywhere in the app
- **Export** — click **Export CSV** to download all deals

Partners

Partners are the **organizations** you work with — chambers, city government, associations, businesses.

When to add one: Any organization you have a relationship with, whether you're selling them ad space, they're hosting a kiosk, or they're a community connection. **Add a partner before adding a deal or contact** — everything links back to a partner.

Partner Types

Type	Example
Chamber	Morgan Hill Chamber of Commerce
City / Gov	City of Morgan Hill
Downtown Assoc	Downtown Morgan Hill
Community Org	Morgan Hill Community Foundation
Local Business	A restaurant, salon, or shop buying ad space
Nonprofit	A local nonprofit

What to Fill In

- **Name** — full organization name
- **Type** — pick the closest match
- **Website** — optional but useful
- **Notes** — anything important about the relationship

How to Use It

- Click + **Add Partner** to create a new one

- Click any partner to open their full record — you'll see all their linked deals, contacts, kiosks, tasks, and activity in one place
 - Use the type filter buttons to narrow the list
 - **Deactivate** a partner instead of deleting to preserve history
 - **Export CSV** downloads all partners
-

Contacts

Contacts are the **people** at your partner organizations — the person you email, call, and pitch to.

The rule: One contact per real person. If you talk to two people at the same organization, add two contacts — both linked to the same partner.

What to Fill In

Field	Notes
Name	Full name
Role	Their title — "Executive Director", "Owner", "Marketing Manager"
Email	Primary contact email
Phone	Optional
Partner	Always link them to their organization
Notes	Communication preferences, context, anything useful

How to Use It

- Click **+ Add Contact** to create a new one
 - Contacts link to partners and deals — when you open a deal, you'll see who the contact is
 - Contact name and email are used in auto-generated proposal emails
 - **Export CSV** downloads all contacts
-

Deals

A deal is one **advertising placement** being sold to one partner. This is the heart of your sales process.

When to create one: The moment a real conversation starts — even if they haven't said yes. Start it at Prospect and move it forward.

What to Fill In

Field	Notes
Title	Describe it clearly — e.g. "Top Banner — Morgan Hill Chamber"
Partner	Who you're selling to
Contact	The person you're talking to
Kiosk	Which kiosk the ad will run on
Stage	Where it is in the pipeline
Placement type	What kind of ad — banner, wrap, featured event, PDF map, etc.
Screen	Screen 1, Screen 2, or Both
Pricing tier	Option 1 (Launch), Option 2 (Market/Recommended), Option 3 (Premium)
Launch pricing	Toggle on for the 50% intro discount
Months	How long the campaign runs
Run dates	When the ad starts and ends
Design status	Briefed → In Progress → Revised → Approved → Uploaded
Invoice status	None → Deposit Pending → Paid → Overdue
Notes	Internal only — not visible to partners

The rate card is built in — once you pick placement type, screen, and pricing tier, the monthly rate and total value calculate automatically.

Inside the Deal Record

- **Stage badge** — click it to change the stage
- **Invoice badge** — click it to update payment status
- **Run dates** — click the 📅 icon to set or edit
- **Creative status** — click each bubble to advance the design workflow
- **Canva file** — paste the Canva URL to link the creative directly to the deal
- **Payment link** — click **Generate Payment Link** to create a Stripe link for the exact deal total; use this in proposals

- **Proposal email** — click **Draft Proposal Email** to generate a ready-to-send email with all deal details and the payment link
- **Gmail thread** — paste a Gmail thread URL to link the email conversation to the deal
- **Activity log** — automatically logs stage changes, Canva updates, and payment links; manually add notes, calls, or email summaries

Tasks

Tasks are action items tied to your business. Every deal should have at least one task — the next action. No deal should sit on the board without a clear next step.

The 4 Columns

Column	Meaning
To Do	Not started yet
In Progress	Actively working on it
Review	Done but needs a check before closing
Done	Complete

What to Fill In

Field	Notes
Title	Be specific — "Follow up with Sandra re: proposal" not just "follow up"
Priority	Low / Medium / High
Due date	Always set one — tasks without due dates get ignored
Assigned to	Who's responsible
Partner	Link to the relevant organization
Deal	Link to the specific deal if applicable
Recurring	Toggle on for repeating tasks — Weekly, Monthly, or Quarterly

How to Use It

- Click + **New Task** to add one
- Drag cards across columns as you work through your day
- Tasks due today and overdue tasks appear in the right sidebar on every page

- Filter by partner using the tabs at the top of the page

Kiosks

Kiosks are your physical units in the field. Add one as soon as a location is confirmed — even before it's installed.

What to Fill In

Field	Notes
Name	Clear and specific — e.g. "Kiosk 01 — Morgan Hill Civic Center"
Location	Street address or landmark
Status	Pending → Active → Inactive
Partner	Which organization is hosting it
Installed date	When it went live
Notes	Foot traffic, access, maintenance notes

How to Use It

- Click + **New Kiosk** to add one
- Deals link to a kiosk — so you always know which ads are running on which unit
- Update status to **Active** once the kiosk is live
- **Export CSV** downloads all kiosks

Calendar

Connect your Google Calendar to see today's meetings and events in the right sidebar — without leaving the CRM.

How to connect:

1. Click + **Connect Google** in the right sidebar
2. Sign in and grant calendar access
3. Your events appear immediately in **Today's Agenda**

The connection is saved in your browser. If it ever disconnects, click + **Connect Google** again to re-authorize.

On mobile: Scroll to the bottom of any page and tap **Today's Agenda** to expand your calendar and tasks.

Dashboard

High-level numbers at a glance. Check this weekly, not daily.

What you'll see:

- **Live MRR** — total monthly revenue from all active (Live) deals
- **Pipeline Value** — total value of all open deals
- **Active Kiosks** — how many kiosks are live
- **Tasks Due This Week** — across all partners
- **Upcoming Renewals** — deals with a run end date within 30 days
- **Recent Activity** — last 10 actions logged across the CRM

Click any deal in the Renewals section to go directly to that record.

Social Content

Track your social media posts from idea to published. Not needed for daily use yet — it's ready when you are.

Post statuses: Idea → Draft → Review → Scheduled → Live → Archived **How to use:**

- Click + **New Post** to add one
 - Select platforms (Instagram, Facebook, LinkedIn, TikTok)
 - Write caption, add hashtags, set a scheduled date
 - Link a Canva file for the visual
 - Link to a partner or deal for context
 - Switch to **Calendar view** to see scheduled posts by date
-

Tips & Shortcuts

- **Search everything** — press **Ctrl+K** from anywhere to search deals, partners, contacts, and kiosks
- **Back up monthly** — run a CSV export at the end of each month from the Board, Partners, Contacts, and Kiosks pages

- **Renewal alerts** — the system automatically checks for deals expiring within 14 days and sends an email alert to marilyn@mysyde.com each morning
 - **Direct URLs** — bookmark any page (e.g. [/board](#) , [/tasks](#) , [/contacts](#)) and navigate straight there
 - **Session stays active** — you won't be logged out between visits on the same device
